

HPS Tool Box

Your online transformer tool set

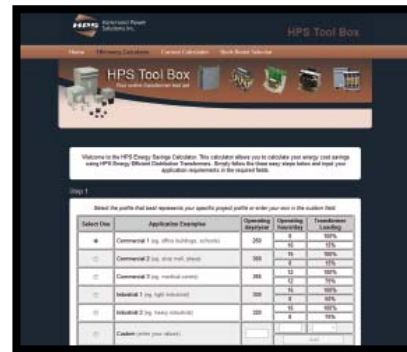

Selecting a HPS Transformer is only a click away!

Choosing a HPS transformer is now easier than ever. Our unique online Transformer Tool Box has many different tools to assist you in your selection:

Efficiency Calculator

Calculate the energy consumption (kWh), energy costs, and energy dollar savings using HPS Energy Efficient Distribution Transformers within a selected application profile.

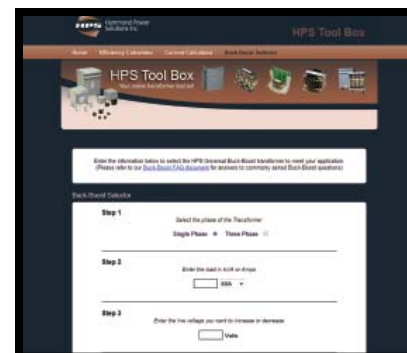

Current Calculator

The Current Calculator tool calculates the Amps, Volts or kVA of a transformer.

Buck-Boost Selector

This tool will select the HPS Universal™ Buck-Boost Transformer part number that best meets your application requirements.
