

Join us for a 1 day hands-on session to learn about The Connected Machine and remote connectivity to your automation equipment using an Ewon Flexy .

### YOU WILL LEARN HOW TO:

- Remotely access a PLC
- Setup and receive alarms from your PLC
- Monitor, troubleshoot, and push code changes to PLCs and industrial automation devices.
- Log data values and send that data into the cloud
- Create an HTML based data dashboard
- Connect wirelessly on the LAN from your smart device to view your HMI or other web servers
- Get data from your machine into Excel and other 3rd party cloud services

### Connected Machine Agenda
